NetPMD Design and Integration excel as global fiber network specialists, linking homes and businesses for digital prosperity.

NetPMD provides quality, bespoke network design, and project management solutions within the telecommunications industry. With an end-to-end service complete with fiber network design, installation and integration, NetPMD is connecting communities and enabling smart cities to operate optimally in the modern world.

Revolutionizing fiber design services that empower everyone to thrive in the digital world.

NetPMD is committed to providing innovative and reliable FTTX solutions and stands ready to support Service Providers and construction companies worldwide, delivering next-generation, future-proofed solutions to homes and businesses around the world.

Business Planning Services

With a proven track record, NetPMD have worked across the USA, Europe and the Middle East.

Taking Demographic Data, Subscriber Demand, Buildings & Cell Sites, Existing Infrastructure, and Right of Way, to determine a fiber location & solution that's best for you.

With a team of industry experts at your disposal – offering you expansive experience in communications infrastructure – you'll be armed with all the information you need to make confident and informed decisions going forward. The team are equally at home reviewing third-party plans to provide due diligence where required.

Validating your objectives

Your technological, financial, environmental, societal, and regulatory targets and timescales are ambitious. Our feasibility work helps you to determine how viable and realistic your objectives are.

You no doubt have a multitude of stakeholders to satisfy too. Each with their own concerns and agendas. That's why comprehensive feasibility work done at the very beginning will help you to manage those who have a vested interest in your project.

Unearthing risks to reduce unplanned actions

The design and deployment of fiber networks can throw up a labyrinth of issues. Our feasibility work will shine a light on potential challenges, so that you can work to mitigate them. We analyze information about the city or area on your behalf, and then help you to find all the answers to your questions.

Anticipating obstacles

Our team is hand-picked for their extensive experience and deep knowledge of fiber infrastructure design and deployment. Years in the communications industry means you develop a sixth sense for how feasible a project is, and the hurdles you're likely to face.

Combine that insight with tangible reports, surveys, drawings, and simulations – and you have everything you need to assess the feasibility of your project. From economic viability to the impact on the environment – we cover it all.
